

MBK Tape Solutions Launches New Responsive Website

Easy to Navigate and Find the Right Tape for all Industries

September 2016 MBK Tape Solutions, a leader in the medical and industrial adhesive tape converting industry, announces the launch of its newly redesigned responsive website, www.mbktape.com. The user-friendly, responsive site ensures an informative experience on any mobile device or PC/ MAC based platform. The layout provides multiple ways to navigate the website, search for materials and find information quickly.

Search tools in the extensive on-line product catalog provide easy access to product information and related documents. Knowing that tape products are referred to by different names and the construction and specifications can vary the application, viewers can search by item number, materials, applications, features or industry. The faceted search parameters instantly filter the results, matching the best adhesive tape product with the requirements.

MBK Tape Solutions continually strives to be the best tape converter and invests in training, new technology and equipment. The quick-to fill, Custom Request Form, helps expedite the inquiry. MBK's News and Product Spotlight sections help keep customers updated on MBK events, products and converting services. A glossary of industry related terms and relevant literature and videos were also added.

The MBK Tape Solutions new website makes it easy for users to find product information, which in turn, helps the user make informed decisions when buying a tape product and service. If you have a specialized need that is not outlined in the website, please call to discuss with the knowledgeable sales team.

About MBK Tape Solutions

MBK Tape Solutions, a family-owned company since 1971, custom designs and fabricates a wide range of adhesive tapes, foams, films and other flexible materials for component parts and end-user products. These products service a variety of applications in many markets, including medical, electronic, industrial, display, aerospace, renewable energy, construction, entertainment, to name a few.
