

MBK Tape Solutions Moves to Larger Headquarters

September 2017 – To accommodate growth in both the Medical and Industrial markets, MBK Tape Solutions has moved to a new, larger converting facility. Their new address is 9959 Canoga Ave, Chatsworth, California 91311. The current phone number remains the same at 818-998-1477.

MBK's new facility nearly doubles their previous manufacturing footprint and includes a state-of-the-art ISO Class 8 clean-room with four, independent work cells for manufacturing and packaging. The shop and warehouse are utilizing lean manufacturing principals, ensuring quality products and efficiency. The employees enjoy comfortable new offices and an environment that promotes streamlined communication and collaboration to better serve customers.

“Our new facility gives us the much-needed separation of Medical and Industrial work spaces. We designed our new space to accommodate our anticipated growth over the next few years. We will be able to rapidly expand when called upon to do so. The new space also has been set up with the latest and greatest technology which will help expedite everything from quoting in sales to processing orders in customer service, all the way through the value stream into manufacturing” says Jason Zajac, Vice President of Sales.

After months of planning, the move went smoothly and the vision became reality. Everyone pitched in with the design of the new building and the physical move of the machines, materials and offices. The entire MBK team was excited to build a better manufacturing environment not just for themselves, but more importantly for their customers. Many thanks to the entire MBK family for their patience, long hours and hard work to make this happen.

About MBK Tape Solutions

MBK Tape Solutions, a family-owned company since 1971, custom designs and fabricates a wide range of adhesive tapes, foams, films and other flexible materials for component parts and end-user products. These products service a variety of applications in many markets, including medical, electronic, industrial, display, aerospace, renewable energy, construction, entertainment, to name a few. Its full range of adhesive tape converting services includes die cutting, laminating, slitting, printing, product fulfilment and more. Utilizing the skills and expertise of an in-house staff, MBK Tape Solutions provides cost-effective engineered adhesive tape converting solutions and quality adhesive tapes and materials.
