

MBK Tape Solutions specializes in converting adhesive tapes, films, foams and fabrics into assembly aids, component parts and finished products for medical, electronics and almost every industry imaginable. From concept to full scale production, the MBK team will work with you to meet your application requirements and deliver reliable products.

Converting Capabilities

MBK converts jumbo rolls and sheets of adhesive tapes and flexible materials into custom shapes, sizes and configurations, making it easier and more economical to use. We offer design support, prototyping, die-cutting, multi-layer lamination, slitting, ISO 8 clean room manufacturing and packaging. No matter the volume or complexity of the job, MBK will provide innovative cost-effective solutions.

Tape Applications

- Bonding
- Color-Coding
- Decorating
- Electrical Insulating, Shielding & Conducting
- Gasketing, Insulating & Sealing
- Medical / Stick to Skin
- Masking
- Mounting
- Surface Protection
- Strapping
- Sound & Vibration Damping
- Splicing
- Safety & Security

Industries Served

- Aerospace
- Building & Construction
- Distributors & Converters
- Electrical & Electronics
- Entertainment & Hospitality
- FDA Food Contact
- Government
- Graphic Arts & Display
- Manufacturing
- Medical, Wearables & Health Care
- Paper, Printing & Packaging
- Personal Care
- Recreation
- Renewable Energy
- Transportation
